

An application call arrives
app ID · OnComplete · argument array

Any application
arguments?

no

yes

Bare route · no selector
the OnComplete alone picks
the method, at most one
per action, and it runs

The OnComplete must be one the method allows
NoOp · OptIn · CloseOut · Update · Delete

Methods declaring create=allow are matched
on argument zero here, with no ID check

no match yet

Is the application
ID zero?

matched

zero · a creation

non-zero · it exists

create=require
creation methods

create=disallow, the default
ordinary methods

matched

matched

no match

no match

The method body runs

err · nothing matched
the call is rejected
