

Fake pool  
anyone can deploy one  
and answer any question you ask it

'I am the USDC/ALGO  
pool.'  
Believe it and you are  
done.

Factory  
the only contract you trust by ID

Consumer contract  
about to swap

records

reads the pair,  
gets one app ID

creates

calls the ID  
the registry gave it

Registry box  
asset pair → pool app ID

Real pool  
created by the factory
